EXPERIENCE

Starting My Journey — Front-End Development   *2023*
Self-Taught Learning Path

- I started learning about Front-End development from scratch, completely on my own.
- Followed a fully self-taught path using learning resources from Udemy, YouTube, and online developer communities.
- Practiced fundamentals including HTML, CSS, JavaScript, and modern UI development concepts through structured video courses and hands-on exercises.

Collaboration Project   *2024 - ...*
Cooperation with Backend Developer Friend

- Built small to medium-scale frontend projects to apply UI and interaction concepts in real environments.
- Focused on improving responsiveness, user experience, and component reusability.
- Continuously expanded knowledge through project-based learning and iterative improvements.

E-Commerce   *2025-...*
Challenging my self to build a E-Commerce project from scratch

- Built the frontend of an online shop using Next.js.
- Used Supabase for authentication and database interaction.
- Designed UI components with shadcn/ui to maintain a clean and modern interface.
- Styled the application using Tailwind CSS for fast, responsive, and consistent layouts.
